SERIES T Gummed-Tape PRINTERS

- Prints continuous message—101/4" (260mm)
 Reinkable, quick-change K7 ink cartridge repeat
- Attaches to any gummed tape dispenser— Better Pack, Marsh, Nashua and many others
- Furnished complete with mounting brackets
- Cuts costs by reducing inventory of pre-printed tape

- -black, red, green or blue. Sponge inking system for pigmented inks optional
- Five type systems: Kiwi Channelok®, elastic type bands, hook-on type bands, baselock and printing mats
- Quick change marking wheel with long life, knurled steel drive tracks

BULLETIN 245P

Specifications and Dimensions

Imprint repeat: 101/4" (260mm)

Inking systems:

Standard—K7 pre-inked ink cartridge, quick change, reinkable, long life, waterproof ink, black, red, green or

blue.

Optional—Kiwi sponge inking for pigmented inks—white, orange, yellow, etc.

Type Systems: Kiwi Channelok*, Kiwi elastic type bands, Kiwi hook-on type bands, baselock and printing mats.

CHOICE OF FIVE TYPE SYSTEMS

Baselock Type—Molded characters provide clear print definition. Use individual characters or complete words and slogans. Ask for Bulletin #160.

Kiwi Channelok® D Type—Deepcut characters provide excellent print definition. Snaps in place. Quick change. Available in individual characters or in strips containing full words and messages. Ask for Bulletin #191.

Kiwi Elastic Type Bands—Continuous loop with message molded into elastic rubber. Quick change, easy to use. Stretches over marking wheel. Recommended when printing wide variety of messages.

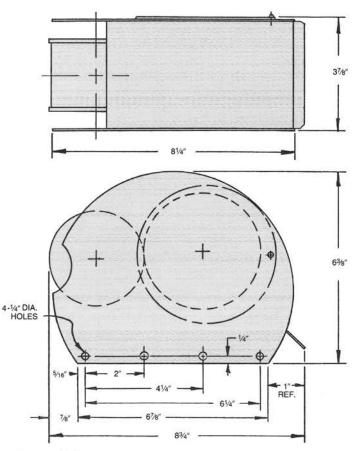

Kiwi Hook-On Type Bands—Similar to elastic type bands, but type bands are coupled together by brass hooks. No need to remove marking wheel when changing type bands. Recommended when frequent message changes are required.

Kiwi Printing Mats— V_8 " (3mm) thick printing mats permanently glued to rubber backing on marking wheel. Recommended for those applications where message is changed infrequently.

MODEL	Tape Width	Inking System	Maximum Print Height
T104	2" (51mm)	K7 Ink Cart. (P/N XK7150)	13/8 (35mm)
T105	21/2" (64mm) to 3" (76 mm)	K7 Ink Cart. (P/N FO77835)	17/s (48mm)
T99	2" (51mm)	Kiwi Sponge	13/8 (35mm)
T100	21/2" (64mm) to 3" (76mm)	Kiwi Sponge	1% (48mm)

Standard Model includes: Tape Printer complete with marking wheel, ink cartridge, reinking kit, mounting hardware less printing type.

How to Order:

- 1. Specify make and model of your tape dispenser.
- 2. Specify tape width and absorbency of tape surface.
- Specify desired message and repeat distance. Kiwi will recommend best type system for your application.
- 4. Specify ink color.

TAPE PRINTER MODEL T104, T105

INSTRUCTIONS

MOUNTING: All tape printers come equipped with mounting brackets for attaching the printer to the tape dispenser. These mounting brackets vary according to the type of tape dispenser being used.

TAPE THREADING: Refer to Figure 1 for the proper method of threading the tape thru the tape printer.

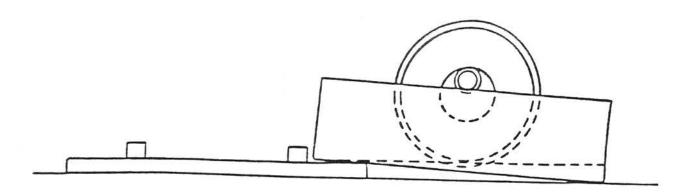

INSERTING TYPE: The marking wheel can be easily removed from the tape printer by first lifting up the marking wheel arm (Item 7) shown on Figure 2, and then pulling the marking wheel away from the tape printer.

After the marking wheel is removed, the desired type can be inserted onto the marking wheel. The wheel can then be reinstalled into the printer.

To remount the marking wheel into the printer, place wheel under the marking wheel arm (Item 7) and push the wheel in until it snaps into place.

INK CARTRIDGE ADJUST:

- A The lever on the bottom of the ink cartridge is used for cartridge adjustment. Move lever until kiss contact between the cartridge and type is obtained. Excessive pressure will:
 - 1. Restrict marking wheel rotation;
 - 2. Cause premature cartridge wear;
 - 3. Reduce ink mileage.
- B When replacing ink cartridge, move lever so cartridge is fully backed away from marking wheel.

- 1. INITIAL FILLING: A 4 oz. bottle of Kiwi Ink Should fill the chamber to the correct fill line. Replenish as required to bring the level back to the fill line.
- 2. REINKING: First, remove cover and place beneath one end as shown. THEN, Place K7 inker over axle shaft and begin rotating and reinking from the shallow end.
- 3. DRAINING EXCESS: If you ever over-ink and desire to drain the K7 inker, trap the axle at the shallow end with either paper clips or masking tape.
- 4. CAUTION: Each part is fully compatible with all Kiwi Ink. For proper performance of the reinker and your marking equipment, always use KIWI INKS.
- 5. ALWAYS SNAP COVER IN PLACE AROUND ENTIRE EDGE it will save ink evaporation and avoid spillage if someone picks up the reinker by its cover.
