- Quick Change—Snaps into channels of Kiwi Orbit series or custom built case coders and Channelok type plates
- Available in regular or deepcut styles
- Natural rubber composition
- Five type body sizes—½″, ¾″, 1″, 1¼″, & 1½″
- Most deepcut styles available in economically-priced Letter or Figure sets

CHARACTER HEIGHT
TYPE BODY
DEEP CUT

Channelok type is held securely in type channels which are part of the marking wheel. The deepcut style is required with Kiwi Orbit Series Coders (Bulletin #310).

Deepcut type features a high type relief for improved printing. Saw cuts in the type body allow it to curve to fit the circumference of the marking wheel.

CHANNELOK
FIGURE (F) AND LETTER (L) SETS

For maximum economy most deepcut style Channelok type can be purchased in sets of four (designated by the suffix "4" after the number). Type sets are specified by adding an "F" or "L" prefix to the type style number (examples: F227D4 . . . L231D4). An "F" set consists of the figures 0-9; an "L" set consists of the letters A-Z.

The table below shows sets stocked for immediate delivery.

Character Height	Type Body	Figure Set	Letter Set
3/8″	3/4″	F227D4	L227D4
7/16″	3/4″	F228D4	L228D4

MAGFLEX PRINTING MATS

Magflex printing mats have a magnetic backing which permits quick placement and removal. They are used with Kiwi Orbit Series Case Coders, Kiwi Flexographic Printers and Kiwi KD Flat Case Printers. Magflex mats are recommended where blocks of copy, bar codes, logos or similar information must be changed frequently. Mats are available in 0.125″ (5 mm) and 0.250″ (10 mm) thicknesses.

MAGFLEX PRINTING MATS

Printing Mats are recommended for use with multi-line copy, bar codes, company logos and designs. Mats can be furnished plain or adhesive backed, and are used with Kiwi Orbit Series Case Coders, Model 1020 Small Carton Printers and Kiwi Flexographic Printers. Typical thickness is 0.125″ (5mm) Printing mats are available in either rubber or photopolymer materials.

Printed in U.S.A.
